# Definition of Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic, SOC 51-4081

Set up, operate, or tend more than one type of cutting or forming machine tool or robot.

# Occupation Snapshot

As of 2019Q3, total employment for Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic in the Workforce Solutions Northeast Texas was 141. Over the past three years, this occupation added 33 jobs in the region and is expected to decrease by 4 jobs over the next seven years, or at an annual average rate of -0.4%.

Data as of 2019Q3 unless noted otherwise

Note: Figures may not sum due to rounding.

1. Data based on a four-quarter moving average unless noted otherwise.

2. Wage data are as of 2018 and represent the average for all Covered Employment

3. Data represent found online ads active within the last thirty days in the selected region; data represents a sampling rather than the complete universe of postings. Ads lacking zip code information but designating a place (city, town, etc.) may be assigned to the zip code with greatest employment in that place for queries in this analytic. Due to alternative county-assignment algorithms, ad counts in this analytic may not match that shown in RTI (nor in the popup window ad list).

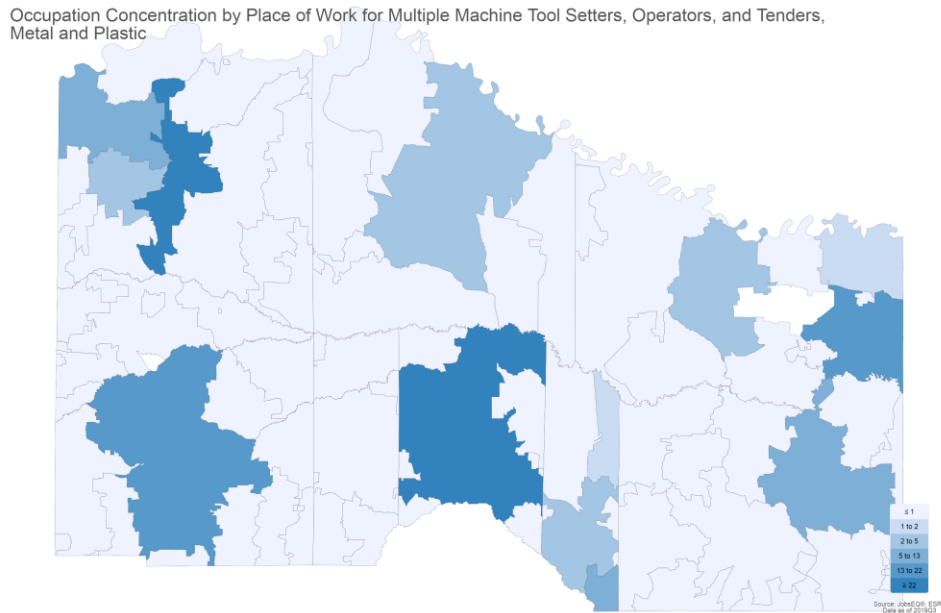

Source: JobsEQ®, Data as of 2019Q3. The shaded areas represent national recessions.

Occupation employment data are estimated via industry employment data and the industry/occupation mix. Industry employment data are derived from the Quarterly Census of Employment and Wages, provided by the Bureau of Labor Statistics and currently updated through 2019Q1, imputed where necessary with preliminary estimates updated to 2019Q3. Wages by occupation are as of 2018 provided by the BLS and imputed where necessary. Forecast employment growth uses national projections from the Bureau of Labor Statistics adapted for regional growth patterns. Occupation unemployment figures are imputed by Chmura.

# Geographic Distribution

The below maps illustrate the ZCTA-level distribution of employed Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic in the Workforce Solutions Northeast Texas. Employment is shown by place of work and by residence.

**Top ZCTAs by Place of Work for Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic, 2019Q3**

Region	Employment
ZCTA 75460	39
ZCTA 75455 (Titus County, TX portion)	22
ZCTA 75501	15
ZCTA 75482	13
ZCTA 75668 (Morris County, TX portion)	13
ZCTA 75486	9
ZCTA 75551	6
ZCTA 75638 (Morris County, TX portion)	4
ZCTA 75426	3
ZCTA 75570	3

# Employment by Industry

The following table illustrates the industries in the Workforce Solutions Northeast Texas which most employ Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic. The single industry most employing this occupation in the region is Other Fabricated Metal Product Manufacturing, NAICS 3329. This industry employs 64 Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic—employment which is expected to decrease by 3 jobs over the next ten years; furthermore, 66 additional new workers in this occupation will be needed for this industry due to separation demand, that is, to replace workers in this occupation and industry that retire or move into a different occupation.

**Top Industry Distribution for Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic (51-4081) in Workforce Solutions Northeast Texas**

NAICS Code	Industry Title	Current			10-Year Demand		Total Demand
		% of Occ Empl	Empl	Exits	Transfers	Empl Growth	
3329	Other Fabricated Metal Product Manufacturing	44.9%	64	23	43	-3	63
3362	Motor Vehicle Body and Trailer Manufacturing	11.9%	17	6	12	0	18
3331	Agriculture, Construction, and Mining Machinery Manufacturing	7.2%	10	4	7	-1	10
3359	Other Electrical Equipment and Component Manufacturing	5.2%	7	3	5	0	8
3311	Iron and Steel Mills and Ferroalloy Manufacturing	4.3%	6	2	4	-1	5
3323	Architectural and Structural Metals Manufacturing	3.1%	4	2	3	0	5
3363	Motor Vehicle Parts Manufacturing	2.7%	4	1	3	0	4
3399	Other Miscellaneous Manufacturing	2.5%	4	1	2	0	3
5613	Employment Services	2.4%	3	1	2	0	4

Data as of 2019Q3 except wages which are as of 2018. Note that occupation-by-industry wages represent adjusted national data and may not be consistent with regional, all-industry occupation wages shown elsewhere in JobsEQ.

Note: Figures may not sum due to rounding.

Occupation employment data are estimated via industry employment data and the industry/occupation mix. Industry employment data are derived from the Quarterly Census of Employment and Wages, provided by the Bureau of Labor Statistics and currently updated through 2019Q1, imputed where necessary with preliminary estimates updated to 2019Q3. Forecast employment growth uses national projections from the Bureau of Labor Statistics adapted for regional growth patterns.

# Wages

The average (mean) annual wage for Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic was \$29,000 in the Workforce Solutions Northeast Texas as of 2018. For the same year, average entry level wages were approximately \$19,600 compared to an average of \$33,600 for experienced workers.

Occupation wages (mean, median, and percentiles) are as of 2018 provided by the BLS, modified and imputed by Chmura where necessary. Entry-level and experienced wages are derived from these source data, computed by Chmura.

# Education Profile

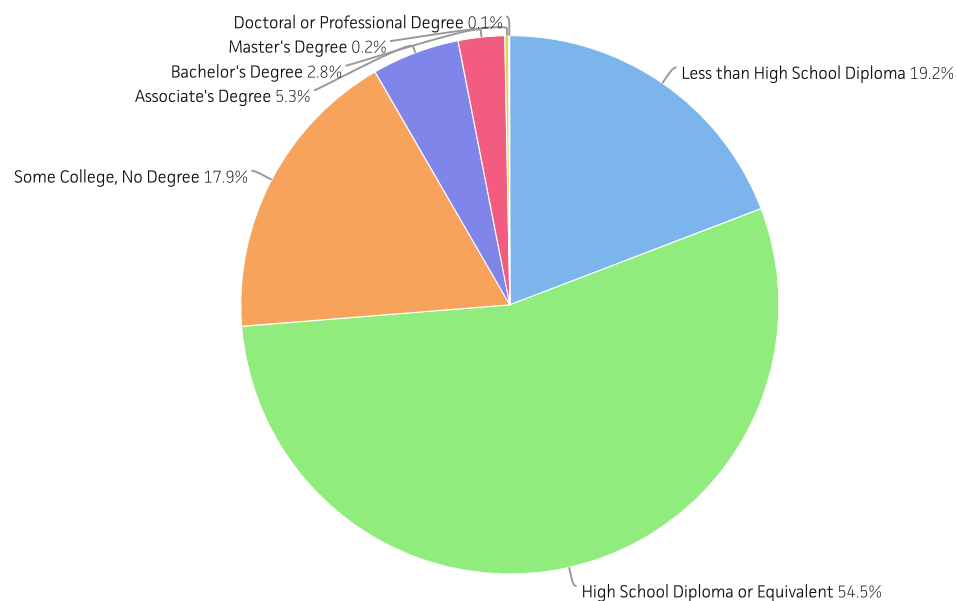

Typical education and training requirements for Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic are described below.

## Education and Training Requirements

Typical Entry-Level Education:	High school diploma or equivalent
Previous Work Experience:	None
Typical On-the-Job Training:	Moderate-term on-the-job training

Source: JobsEQ®

## Educational Attainment Profile

Source: JobsEQ®

Education and training requirements are from the Bureau of Labor Statistics (BLS); educational attainment mix are regional data modeled by Chmura using Census educational attainment data projected to 2019Q3 along with source data from the BLS.

# Awards

No postsecondary program awards were granted by postsecondary institutions located in the Workforce Solutions Northeast Texas in the 2018 academic year in programs identified as providing training for Multiple Machine Tool Setters, Operators, and Tenders, Metal and Plastic (for further details, see the source note).

Awards data are per the National Center for Education Statistics (NCES) and JobsEQ for the 2018 academic year. Any programs shown here have been identified as being linked with the occupation being analyzed. Other existing programs may also provide training in the region for this occupation but have not been so identified by the program-occupation crosswalk (see the FAQ section at the end of this report for more details). Furthermore, any programs shown here reflect only data reported to the NCES; reporting is required of all schools participating in any federal finance assistance program authorized by Title IV of the Higher Education Act of 1965, as amended—other training providers in the region that do not report data to the NCES are not reflected in the above.

# Apprenticeships

The apprenticeable specialties associated with this occupation are:

<b>Rapids Code</b>	<b>Rapids Title</b>
0208	Four-Slide-Machine Setter
0229	Gunsmith
0234	Gear-Cutting-Machine Set-Up Operator (Machine Shop)
0241	Gear Hobber Set-Up Operator
0263	Machine Setter (Machine Shop)
0317	Machine Setter (Clock and Watch)
0374	Ornamental-Metal Worker
0511	Machine Operator I
0532	Spring Maker
0534	Spring-Manufacturing Set-Up Technician
0588	Tool-Machine Set-Up Operator
0659	Machine Try-Out Setter
0664	Gear-Cutting-Machine Set-Up Operator, Tool (Machine Shop)
0938	Machine Setter (Any Industry)
0958	Machine Set-Up Operator

Source: [JobsEQ®](#)

Apprenticeable occupations are identified through the Department of Labor's Registered Apprenticeship program.

# Region Definition

**Workforce Solutions Northeast Texas is defined as the following counties:**

Bowie County, Texas

---

Cass County, Texas

---

Delta County, Texas

---

Franklin County, Texas

---

Hopkins County, Texas

---

Lamar County, Texas

---

Morris County, Texas

---

Red River County, Texas

---

Titus County, Texas

---

# FAQ

## What is SOC?

The Standard Occupational Classification system (SOC) is used to classify workers into occupational categories. All workers are classified into one of over 840 occupations according to their occupational definition. To facilitate classification, occupations are combined to form 23 major groups, 97 minor groups, and 461 occupation groups. Each occupation group includes detailed occupations requiring similar job duties, skills, education, or experience.

## What is a location quotient?

A location quotient (LQ) is a measurement of concentration in comparison to the nation. An LQ of 1.00 indicates a region has the same concentration of an occupation (or industry) as the nation. An LQ of 2.00 would mean the region has twice the expected employment compared to the nation and an LQ of 0.50 would mean the region has half the expected employment in comparison to the nation.

## What is training concentration?

The training concentration analysis compares local postsecondary training output compared to the national norm. Let's consider registered nurses as an example. If in the nation, one RN award is granted for every ten RNs employed, that 1:10 ratio is the national norm. If in your region your schools also grant one RN award for every ten RNs employed, then your region will be right at the national norm, or we say at 100% of the national norm which is termed a 100% training concentration. If your region grants two RN awards for every ten employed, your region would be at twice the national norm or have a 200% training concentration. Similarly, if your region grants one RN award for every twenty employed, your region would be at half the national norm or have a 50% training concentration.

## What is the program-to-occupation crosswalk?

Training programs are classified according to the Classification of Instructional Programs (CIP codes). For relating training programs, this report uses a modified version of the CIP to SOC crosswalk from the National Center for Education Statistics (NCES). While this is a very helpful crosswalk for estimating occupation production from training program awards data, the crosswalk is neither perfect nor comprehensive. Indeed, it is hard to imagine such a crosswalk being perfect since many training program graduates for one reason or another do not end up employed in occupations that are most related to the training program from which they graduated. Therefore, the education program analyses should be considered in this light.

As an example of the many scenarios that may unfold, consider a journalism degree that crosswalks into three occupations: editors, writers, and postsecondary communications teachers. Graduates with a journalism degree may get a job in one of these occupations—and that may be the most-likely scenario—but a good number of these graduates may get a job in a different occupation altogether (the job may be somewhat related, such as a reporter, or the job may be totally unrelated, such as a real estate agent). Furthermore, a graduate may stay in school or go back to school for a degree that will lead to other occupation possibilities. Still another possibility includes the graduate not entering the labor market (maybe being unemployed, being a non-participant, or moving to another region).

## What is separation demand?

Separation demand is the number of jobs required due to separations—labor force exits (including retirements) and turnover resulting from workers moving from one occupation into another. Note that separation demand does not include all turnover—it does not include when workers stay in the same occupation but switch employers. The total projected demand for an occupation is the sum of the separation demand and the growth demand (which is the increase or decrease of jobs in an occupation expected due to expansion or contraction of the overall number of jobs in that occupation).

## What is NAICS?

The North American Industry Classification System (NAICS) is used to classify business establishments according to the type of economic activity. The NAICS Code comprises six levels, from the “all industry” level to the 6-digit level. The first two digits define the top level category, known as the “sector,” which is the level examined in this report.
